

# Advisory Bodies for the Aged Care Sector.

**Aged care providers gain access to dedicated professionals and best practice methods for effective implementation of quality care and consumer advisory bodies.**

## ABOUT

The [Advisory Board Centre](#) is the Australian based professional body for the global advisory sector; providing education, certification, research and advocacy.

## HOW WE CAN HELP

- Free access to the best practice framework to support their advisory bodies. [Download here](#)
- Free access to the Advisor Concierge service to scope your needs and connect with professionals to support implementation
- Resources and education through the [Aged Care Certified Chair Executive Program](#). This includes membership to the aged care best practice benchmarking community.
- [Foundations e-learning program](#) for your Board and your team in understanding the role of advisory bodies and best practice.

## ADVISORY BODIES

- Do provide access to specialist or strategic insights, robust analysis and critical thinking. They are not legislated or regulated by the Corporations Act
- Can operate in accordance with a Best Practice Framework and Charter that sets out the bodies' structure, participation, and operations
- Are not authorised to act or make binding decisions on behalf of the organisation and do not have fiduciary responsibility

## THEY HELP TO AVOID

- Widely varying implementation approaches that put policy objectives at risk
- Lost time and money from over-training advisors with governance board training
- Poor quality consumer engagement
